Office Action Summary	Application No. 10/673,333	Applicant(s) MATONO ET AL.	
	Examiner A. J. HEINZ	Art Unit 2653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2653

1. Applicant's election, with traverse, of the Group II invention[Cls.1-5,10-15] in Paper dated 7/14/05 is acknowledged.

The traversal is on the ground(s) that because there is sufficient commonality in the subject of both the apparatus and method claims there is no significant burden for the examiner to examine both inventions. This is not found to be persuasive because the applicant has failed to provide substantive evidence showing, for example, that searching the additional varied and complex processes {for example claim 8 requiring the "growing of a plating film"} classified in class 29, when it is not required for the apparatus, would not place a greater burden upon the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 6-9&16-22 are withdrawn from further consideration by the examiner, pursuant to 37 CFR 1.142(b) as being drawn to a non-elected invention.

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Art Unit: 2653

The Title should provide a more detailed structural identification of the feature or features which distinguish the invention from the prior art.

The intended results produced by the structural differences can also be part of the content of the Title but should be made subordinate to the structural differences.

The portion of the Title directed to the method should be deleted.

3. The abstract of the disclosure is objected to because it fails to provide a more detailed indication of the feature or features to which the instant invention is directed and/or distinguish it from the prior art. Correction is required. See MPEP §608.01(b).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2653

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 10,14&15 are rejected under 35 U.S.C. §102(b) as being anticipated by Nakamura.

See Figs. 12a&b. Note, to the extent claimed and understood, the structure as shown in Addendum A reads on and performs to the same degree as claimed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kanamine, Yano, Crue and Santini show various configurations for thin film heads.

7. For a complete response applicant should identify how the claimed structure of his invention defines over **all** the art of record.

Moreover, where the applicant disagrees with the reasoning and/or application of the prior art on critical points of the claims, they should identify how the claimed structure of their

Art Unit: 2653

invention defines over **all** the art of record not just the applied art.

Where applicant believes that the art is redundant and/or superfluous relative to the critical aspects of the claimed invention the applicant may simply state so in rebuttal summary.

8. Claims 1-5 are allowed.

9. Claims 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. If applicant has filed an information disclosure statement and this instant office action does not contain an initialed-off copy (or copies) of all such filed IDS's (or at least a comment to the disposition of such IDS'S in the body of the office action itself) applicant should apprise the examiner of such missing documentation [to the IDS's] in response to this office action so that the examiner can take appropriate action to supply same to the applicant.

Art Unit: 2653

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ whose telephone number is (571) 272-7587. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WILLIAM KORZUCH can be reached on (571)272-7589.

The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.
